Top left of both drawings show Cut 4 and drawing 2 has the "redredge areas" outlined in orange. Please show those in drawing 1.

I otherwise don't have further comment.

We can address the issue regarding cut 8T very easily, just let me know by the end of today (please) if there is anything else that needs to be modified.

Stan,

I have addressed all of CDM's comments (see below), however, please amend drawings to show the same "black box/black outlined" areas, they vary between the drawings (see cut 8T) and add a discussion of these areas in the legends.

Thank you.

Stephanie – welcome back

CDM Smith reviewed the two figures submitted by the CPG. We have the following questions on the figures:

- Besides the insert, the CPG has submitted two almost identical figures. What are the functions of the two figures?
- Just want to point out that CPG has undercut three spots east of the no dredge zone.
- There are several rectangular shapes in Cut 8T that are not labeled in Figure 1 of 2. CPG should clarify the meaning of those rectangular shapes. Additionally, not all of those shapes were shown in Figure 2 of 2.

Mike and Stephanie,

As requested, attached are two PDF files providing all the post-dredging bathymetry and poling results in one place. The next email will contain all of the DWG and other backup files used to generate these PDFs. Please call me if you have any questions.
